

Maximise staff productivity and
reduce client wait times with
Harrison Scheduler

Better business, better care

View staff and appointments across all locations to ensure clients receive the care they need as soon as they need it.

Rostering in a fraction of the time

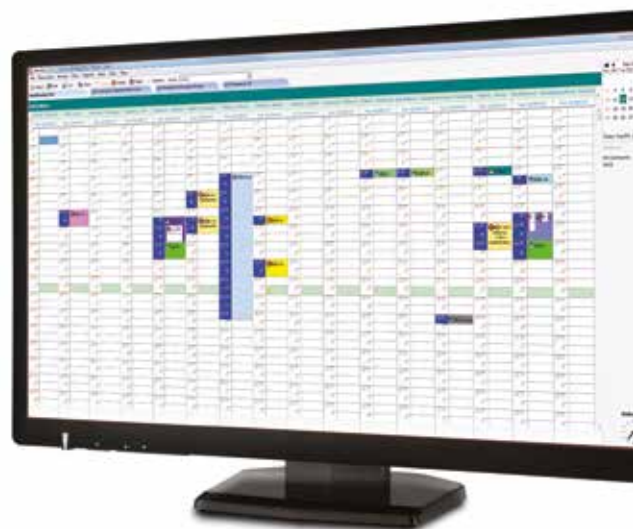

Ensuring your staff operate at maximum efficiency to meet the needs of your clients is crucial for any health care business. Take into account staff preferences and availability so everyone is happy.

But many people operate systems that require extensive manual checking, leading to errors or oversights that cost their business dearly.

See all schedules at a glance

With Harrison Scheduler you can instantaneously see every appointment, location and staff member, allowing you to identify inefficiencies and gaps so you can improve your operations to deliver the best possible care.

With built-in conflict checking, scope for staff to identify their own availability and internal rules to ensure bookings are made in keeping with complex business and funding guidelines, Harrison Scheduler is the key to staying at the top of your game.

Streamline business practices

The pressure on health care businesses to improve their business practices has never been greater.

With Harrison Scheduler you can identify gaps and over-staffing, track staff resources and identify opportunities for growth to make your business more effective and efficient.

Reduce booking wait times

Nobody likes to wait, especially if a delay causes unnecessary discomfort.

With Harrison Scheduler, you can easily find first available appointments, eliminate time consuming manual cross-checking, and book in advance across multiple services. Also receive automatic notifications of double bookings or conflicts.

Rostering in a fraction of the time

With Harrison Scheduler you can spend minutes instead of hours creating rosters that take into account staff preferences and availability.

Features checklist

- ✓ **Single view for staff across services**
- ✓ **Find first available appointment times across single or multiple locations**
- ✓ **Centralised staff and resource management**
- ✓ **Manage co-payments and multiple funding models**

- ✓ **Software scales seamlessly as you grow**
- ✓ **Online solution to save time and reduce paper**
- ✓ **Electronic task and multiple diary management**
- ✓ **One stop access to information**
- ✓ **Deliver more efficient service**

View bookings any way you need

Having a clear picture of each client and staff member's overall bookings is an essential component of effective client care.

With Harrison Scheduler you can view every appointment and location from both the client and staff perspective. You can also create your own groups based on location and skill sets.

Comply with complex funding models

Are you staying on top of all your funding requirements and receiving every cent you are entitled to?

With Harrison Scheduler you can gather all the information you need for submissions in real-time to ensure you stay within required limits.

Manage multiple locations and large teams

Though Harrison Scheduler works exceptionally well for small businesses, the more complex your service, the more drastic the improvements you will find in your resource management and operations. No matter which site you view from, the information is right at your fingertips so you always feel like you are part of the one team.

Why HMS?

For over twenty years our market-leading software has been solving the real-world problems of health care businesses from major metropolitan health care networks, regional health care services to community transport providers and many more.

We analyse your current clinical practices and desired outcomes before suggesting the best package to suit your needs. We can then migrate your current data, train staff and provide ongoing support to answer any questions you have or deal with technical issues.

No matter if you are a community service provider or a large-scale, multi-site provider, we can tailor our system to fit.
