

Keep staff mobile and provide responsive care to your clients

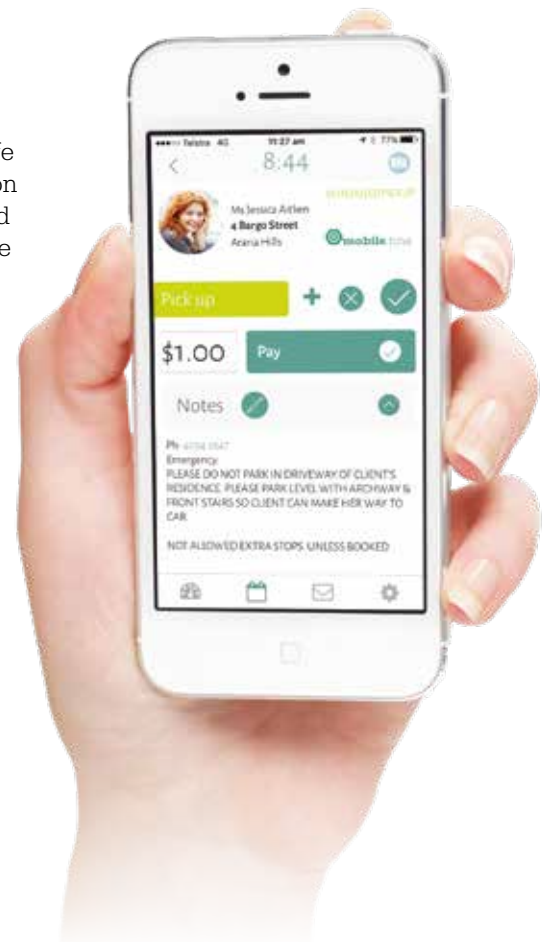

Better business, better care

The mobile solution improves the productivity of your field staff while enhancing the standard of care you deliver.

Customised to suit your unique way of doing business, the mobile add-on gives you the up-to-the-minute data you need to ensure care is delivered when and where it is needed. And with secure mobile access to clients records, plus easier communication between business, clients and staff, your service delivery has never been more seamless.

No matter what changes or delays life throws at you, with the mobile add-on you can keep on top of schedules and care plans to deliver the best possible out-of-office transport and care. In addition, the ability for staff to complete office tasks on-the-go means an end to the chase for lost paperwork and less time spent on data entry.

And your customers will thank you for being so responsive to their needs.

Office in your pocket

Field workers can receive job details, messages, alerts, rosters or even log time sheets without the need to visit the office.

And you can track drivers, vehicles, client pick-up and drop-offs or in-home-care in real time to maximise staff and keep on track.

Multi-task your workers

Are you missing opportunities to multi-task your workers as drivers and in-home workers?

HMS Mobile can help you generate two different income streams from the same visit.

Voice navigation

Similar to google maps, drivers receive step-by-step directions while keeping their eyes on the road.

Features checklist

- ✓ **Improve client care with access to client's booking detail**

Keep staff mobile and provide responsive care to your clients

Appointment reminders

Add an extra level of service and reduce missed appointments with automated SMS appointment reminders for clients.

Maximise funding

Track how far a client has travelled, how long they have spent in the vehicle and discover lost opportunities for lodging with multiple funding models.

Track workers and vehicles in real time

See at a glance if a worker is late or early, their location, actual service times and on-time performance.

Why HMS?

For over twenty years our market-leading software has been solving the real-world problems of health care businesses from major metropolitan health care networks, regional health care services to community transport providers and many more.

We analyse your current clinical practices and desired outcomes before suggesting the best package to suit your needs. We can then migrate your current data, train staff and provide ongoing support to answer any questions you have or deal with technical issues.

No matter if you are a community service provider or a large-scale, multi-site provider, we can tailor our system to fit.
